

DRY MOUNTING

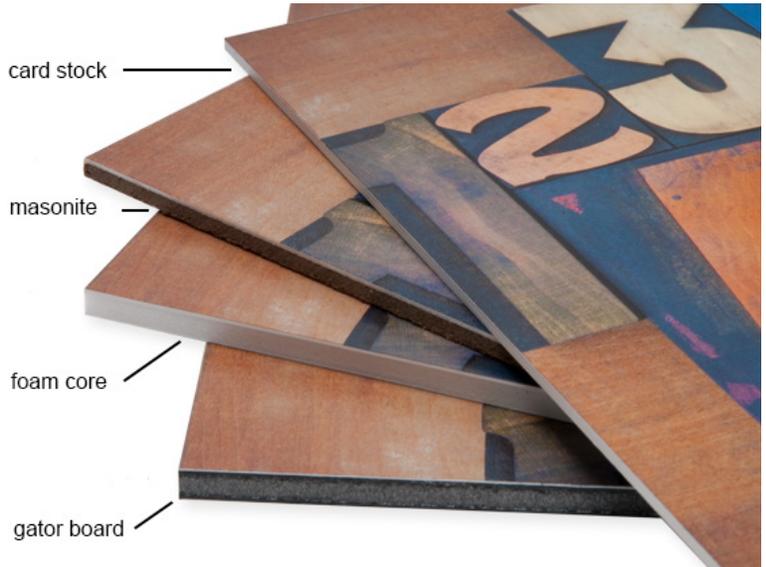

We offer four popular substrates for mounting photographic prints. These, along with a wide range of "standard sizes", provide alternatives to best meet end-use and price points.

Card Stock is a triple weight "white core" mat board and is available as a mounting option for all prints to a maximum size of 30"x40".

Foam Board used is white and 3/16" thick. This light-weight board has long been the industry standard and is clean-cut flush to the edge of the print. Foam Board is available as a mounting option up to a maximum size of 40"x60".

Gator Board used is 3/16" thick and black in colour.

Gator has similar properties to Foam but is much more dense. This results in a substrate that is very durable and less prone to denting and corner damage. Gator Board is available as a mounting option up to a maximum size of 40"x84".

LAMINATING

Laminates used are designed specifically for photographs, are PH Neutral, and have a built-in UV inhibitor. These protective films are available in a Lustre finish and are an excellent alternative to glass. Laminating is available up to a maximum print size of 48"x96".

LIQUID COATING

Using the latest technology and equipment, our UV liquid coaters deliver the best finishes in this category. Although not as robust as film laminates, liquid coating offers protection from fingerprints and other contaminants and can be cleaned by gently wiping with a dry or slightly damp (water only) microfiber cloth and buffing dry. Cleaning UV Coated prints with typical cleaners that are Alcohol based is NOT recommended. Choice of finishes includes; Smooth, Stipple, Linen and Crystal, up to a maximum print size of 20"x30".

*Available in Gloss or Satin.
