

Starting in the School and Sport business? Looking for specialty prints?

The School & Sport Order Entry is designed to address the unique requirements of Photographers working in these markets. Services such as school units, Starpaks, ID Cards, Trader Cards along with specialized marketing material are all available.

Choices start with proofs. Offer your customer the best choices possible! We have a variety of proof sizes to suit your needs. Some of our proofs can feature your editable watermark, logo, or signature on the photograph.

School and sports pictures are a classic gift for a student's family and friends. These are the images that families will keep for years. We can print enlargements small enough to carry in Dad's wallet or large enough to hang above Grandma's mantelpiece. Sizes range from 4 x 6" to 16 x 20," or you can order wallet-sized photos in sets of 4 or 8 pieces. For larger sizes, laminating is available in Luster, Leather, or Liquid finish to protect your product.

For something a little different, mount the young athlete's photo on a 3" button or give the family a chance to piece together their classmates in 60-piece jigsaw puzzle. For most of our enlargements, you can choose between Luster or Metallic photo paper. You also have the option to mount your image on card stock or magnetic backing. Give Mom a picture of her favourite little figure-skater to put on the fridge!

Looking to streamline your volume photography workflow?

Call us to see if FLOW[®] would be a good fit for your Volume Photography needs.

Flow[®] gives you the capability to match student images and data. It has a robust layout creator that allows you to build and print different items such as ID cards, proof sheets and order forms. Use the powerful Green Screen tools in Flow[®] to knockout and apply your own backgrounds. When all of your images and data are matched and packages are entered, you can send your order directly to us.

Main Features

- Direct communication with IQ Galleries
- Instant on-site ID cards and proof sheets
- Improved multiple pose workflow
- Simple user interface
- Improved data management
- Multiple project ability
- Efficient and accurate layout building tools
- Ability to directly FTP jobs and orders
- Create a range of financial, student, photographed lists and reports, all exportable to Excel and pdf formats
